

Dear Federal Regulators,

I listen to K-LOVE on several of the low power translators that are in my area every day as I commute to work and back. The frequencies are 100.9, 107.1 and 92.9. This radio service is my very favorite national network and is my #1 source of news and inspirational music. They are a jewel for our nation because of their integrity and top notch family values. In short I cherish the ability to tune in this great network where ever I go in my area. It would be a terrible loss if any of these translators were to be removed and subverted to some other private station because it would be impossible to maintain any kind of coherency as I am forced to switch stations frequently due to the terrain and reception characteristics in my area. Please keep things as they are so that I may continue to enjoy the wonderful K-LOVE radio network.

Sincerely,

Steven L. Schaenzer
